

# Help us change the lives of children who need it most

**Bond University Physiotherapy Students** are proud to be raising awareness and funds to support the efforts of **GGC Volunteers Limited (ABN 69 600 540 976)**. This amazing organisation is a registered Australian charity whose activities improve the health, education and social welfare of impoverished and sometimes orphaned children in the De Nang region of Vietnam. These children are frequently disabled, with limited access to ongoing health, education and rehabilitation services in their own area. GGC assists in the identification of disabled children in health clinics and orphanages and helps to provide them with therapy services using volunteers and allied health students from University groups.

**With your support,** our purpose is to assist with the provision of much needed therapy equipment, orthotics and resources to assist children and families who most need them. Please take one moment to look carefully at the photos above. For most of these children, their whole day is often spent lying on a mat or in their bed. Your donation will help these children and many more by providing the equipment they need. You would not believe the joy these children express when they are able to sit and interact- but they cannot do so without our help, and without much needed equipment. Each contribution is one step closer to providing these life changing resources.

For further information about our fundraising activities and how you may contribute please contact us via [mari.springberry@student.bond.edu.au](mailto:mari.springberry@student.bond.edu.au)
